Adhesive-free Edge Die-cut Custom Capabilities for 8½ x 11 Sheet Size

Facestocks

96 Bright White Uncoated
Laser Gloss - High gloss finish
Fluorescents - Red, Green, Orange, Chartreuse and Pink
Astrobrights® - Stock colors; contact Customer Support for color availability
Natural Cream
Ultra Matte™ Litho

Order & Freight Minimum

Quantity: 1,000 sheets

Custom Lead-times

3 -10 business days after die approval based on quantity & die availability

Custom Packaging

Bulk carton packed: 250 sheets per bag/ 1,000 sheets per carton

Custom Capabilities for Digital Sizes

Constructions

Stocks for production toner, laser printers or HP Indigo digital presses
Papers from high gloss to offset finishes
Films including white & clear vinyls and 7 mil Teslin®
Permanent, removable, ultra-removable & cover-up products

All stocking constructions in this catalog are available

Sizes Available Include

8½ x 11, 8½ x 14, 11 x 17, 12 x 18, 13 x 19 and 14 x 20

Order & Freight Minimum

As low as 1,000 sheets, depending on construction

Custom Lead-times

3 -10 business days after die approval

Custom Packaging

Bulk carton packed

All Custom Die-cut Labels

No Die-charge

Will not receive a separate die charge

Perforations

Face and/or liner perforations available

Assistance

Spinnaker Coating can easily create custom die patterns - contact Customer Support for additional information

Die Cut Laser Label Tips and Guidelines

Label Formatting

Follow printer software guidelines for formatting label data. See Spinnaker's website at www.spinps.com for label templates. Labels are also compatible with Avery Label Pro and other popular software. For cross reference, select the layout code that corresponds with the Spinnaker label. If no label is found, use the Spinnaker measurements to create a new label.

Fanning

Select the desired number of label sheets and gently fan the edges to reduce static electricity. If curl is evident, manually bend and flatten the sheets before loading.

Loading and Printing

Consult the owner's manual to determine the proper placement of labels in the feed tray. It is acceptable to place the labels directly on top of the paper that may be in the tray. Do not exceed the recommended number of sheets. For best toner anchorage and processing, ensure printer settings reflect proper weight. Proceed to make copies as if printing paper. Reference GSM for printer settings.

Caring for unused labels

Place any unused sheets from the paper tray into the protective plastic bag and store in a cool, dry environment.

Cautions

Do not run label stock through the printer twice. Should a jam appear, locate the jammed sheet and remove it before restarting the printer. Products made with Advantedge Technology[®] adhesive are not recommended for guillotine applications.
